DEAD BODY FOUND ON A LOG.

Supposed to Be Remains of Paul Kirkland—Letter Only Clue.

Hampton, May 18.—A body, supposed to be that of Paul Kirkland, of Sycamore, was found near here to-day. At the coroner's inquest a physician testified that the deceased had been dead six months. The body was stripped of its flesh and any attempt at identification was impossible. A pocketbook containing a letter addressed to Paul Kirkland is the basis of belief that the dead man is he.

The body was found this morning about a mile and a half east of where the Hampton and Branchville railway crosses the Salkehatchie river. The body was on a log crossing the stream, the head being submerged on one side, while the feet were in the water on the other side. The body was badly decomposed.

A pocketbook was found in the stream nearby. The wallet contained three post cards, three letters and \$6. Only one of the letters could be deciphered. This was addressed to "Paul Kirkland" at "Sycamore," and related to a piano purchased from the W. W. Kimball Company, of Augusta, Ga.

An inquest was held with J. D. Murdock acting as coroner. The acting coroner was convinced that the man was accidentally killed while attempting to cross the stream. The verdict of the coroner's jury was that the deceased met his death from some unknown instrumentality.

Johnson Signs Alien Land Bill.

Sacramento, Cal., May 19.—California's alien land bill became the law of the State to-day against protests of Japan and representations of President Wilson and his personal envoy, Secretary of State Bryan. Governor Johnson signed the bill, and 90 days after the adjournment of the Legislature, or on August 19, the act becomes operative.

While the Governor was signing the bill the steamship Korea was passing in through the Golden Gate, bearing two distinguished Japanese, one a former pupil of President Wilson, on a mission of investigation.

Within California the act has encountered triple hostility, which may delay its operation until November 1, 1914. Democrats opposed State legislation at this time as a matter of party regularity. Nevertheless, so plain to them seems to be the demand for the bill that, after exhausting all parliamentary tactics, the Senate gave only one adverse Democratic vote and the Assembly only two.

CAN RIDE ON PULLMAN CARS.

State Law Doesn't Apply to Negro in Inter-State Traffic.

(The State, May 20.)

Attorney General Peoples yesterday gave the opinion that there is no State law to prevent negroes riding on Pullmans on inter-State journeys. The opinion was given in reply to a letter from John G. Richards, Jr., chairman of the Railroad Commission, in which it was asked that an investigation be made of a negro occupying a berth of a Pullman on the Southern's early morning train from the North.

The letter of the Attorney General to Chairman Richards follows:

"I am in receipt of yours of the 14th instant in reference to a negro riding in a Pullman car on the 14th day of May on Southern train No. 31, which runs from Washington to Jacksonville. I note that you say that this negro had secured his ticket and berth in the city of Washington and that his destination was Savannah, Ga. In reply thereto I beg to say that being a native South Carolinian and believing in the separation of the races and holding the personal opinion that I do in regard to same, I would be very glad indeed to be able to give you an opinion that the Pullman Company could not allow members of the negro race to be passengers in their cars within the borders of South Carolina. This, however, is a matter absolutely beyond the control of the General Assembly of this State when it comes to inter-State travel, and therefore is absolutely beyond the control of the courts or executive department of this State.

"We have no remedy at law in a case such as you mention, unless it should be perhaps a personal remedy, to which, of course, as Attorney General, I cannot advise you or any other man to resort.

"There is no law upon our statute books which would reach such conditions as you set out in your letter, and if there were it would be inoperative on account of the fact that it would be in violation of the Federal constitution, which gives to the American Congress the sole right to regulate commerce between the States.

"I would respectfully suggest that you take the matter up with the United States Senators and Congressmen from this State and request them to do that which they should have done long ago—make some endeavor and try to get through some Federal statute similar to our State statute providing for separate accommodation for the different races upon Pullman cars and all inter-State trains, or at least ask them to attempt to get a bill passed similar in some respects to what is commonly known as the Webb act, which applies to shipments of liquor, leaving to the respective States the right to regulate the carrying and transportation of inter-State passengers in this particular, as is done as to the regulation of shipments of liquor."

JAPANESE IN A GLASS HOUSE.

Foreigners are Barred from Owning Land in that Country.

Berlin, Germany, May 17.—The excitement in Japan over the question of California alien land ownership is not well founded, according to an analysis of the Japanese-American situation sent by the Tokio correspondent of the Welt Korrespondenz agency.

The correspondent declares that the Japanese are living in a glass house because foreigners even now are barred from owning land in Japan—a feature of the situation which hitherto has been left unnoticed in Germany. The writer expresses doubt whether the Japanese government will favor abatement from the Panama-Pacific Exposition at San Francisco, which he regards as Japan's only weapon against the United States.

War Talk Unjustifiable.

Honolulu, May 17.—Japanese newspapers as a whole, though hotly opposing the attitude of California toward alien land legislation, take the position that California does not represent the sentiment of the nation, and, therefore, war talk is unjustifiable.

Nevertheless, reports received here that the garrison is to be increased has caused uneasiness among the Japanese laboring population of 75,000 plantation laborers.

Torpedo Boat Vesuvius Damaged.

Newport, R. I., May 19.—The torpedo boat Vesuvius was struck by one of its own torpedoes late to-day and was beached on Hope Island, Narragansett Bay, when the lives of those on board seemed imperiled by the waters which rushed in through a hole astern. As a practice Whitehead torpedo left her side the mechanism went awry in some manner not yet determined. The torpedo turned like a boomerang and crashed into the Vesuvius astern below the water line, gashing a two-inch hole. All pumps were kept working until the Vesuvius ran her nose on the beach of Hope Island. The Vesuvius was noted for its work during the war with Spain.
